REPAIRED 25 March 1952

PAGES 1 ENCLOSURES (NO. & TYPE)

REMARKS

25X1

1. From 30 January through 29 February 1952, [] four railroad tank cars arrived at the Soviet fuel depot in Falkensee. *

25X1

2. []

25X1

- * [] Comment. Systematic observations of fuel deliveries dispatched to various units made since September 1951 indicate that on the average Soviet units receive about one refill per month. During the winter months, fuel deliveries are reduced by about 50 percent, while they are increased to two refills during the summer. The Falkensee fuel depot is subordinate to the 1st Mecz Div the refill of which amounts to about 100 cubic meters. A delivery of four railroad tank carloads of fuel, i.e. approximately 80 cubic meters is therefore credible. The arrival at the depot of two railroad tank cars was reported previously. []

25X1

- ** [] belong to the 1st Mecz Div of the Second Gds Mecz Army, two to the GOFG, two to the Third Gds Mecz Army and two to the air force.
